

SunrosaTM Roses

Sunrosa roses are ideal for small to medium landscape spaces and patio containers. Plants have an upright, bushy habit, but only reach a height of 15-36 inches with a spread of 12-18 inches. Sunrosa roses need less pruning and are easy to care for. Compact plants are covered with blooms that are 1.5-2 inches in diameter.

**Outstanding landscape roses
with manageable growth!**

- Highly disease resistant
- Low maintenance
- Compact & bushy habit
- Long flowering period
- Heat tolerant
- Hardy to Zone 5

Red ZARSBJOH

Sunrosa's signature red variety is a top garden performer and stunning where ever it's planted.

Orange Delight ZARSUNORGDLT

This sunny delight has colors you'd find in a large hybrid tea rose! Petals blend from bright yellow to a peachy orange mango.

Fragrant Pink ZARSUNFRAP

Gorgeous, fragrant flowers that resemble mini peonies! Dark and light pink tones add elegance to each petal.

Yellow Delight ZARSUNORNU

This sport of Orange Delight is a rich, solid vibrant yellow that doesn't fade the way other yellows do. Flowers are beautifully formed.

Sunrosa Roses Production Tips

Potting

Transplant the plug into finish pot filled with well-drained soil. Water at the base of the cutting and keep the foliage dry.

Water

Maintain a good watering routine but do not leave the plants in standing water.

Fertilizer

Fertilize when potted and maintain ongoing fertilizer program for roses.

Light

Grow in full sun for best results.

Temperatures

Optimum temperatures are from 55°-65°F at night and 70°-80°F days. Maintain good air circulation throughout the production area.

Pruning

For best results, keep plants well-trimmed, starting about 4-6 weeks after transplant.

Finish Time

From potting to finish is about 12-16 weeks in 2-3 gallon pots, depending on culture, growing zone and season. Gallon pots can be finished in 8-10 weeks.

Disease & Pests

In trials, Sunrosa varieties have been resistant to downy mildew and black spot. Monitoring for possible pests and diseases is recommended.

Growth Regulators

No growth regulator is needed. Sunrosa is naturally compact.

I was taken with Sunrosa's retail friendly size and wanted to evaluate leaf health and flower power in the very challenging heat and humidity of Athens, Georgia. 'Sunrosa Red' was glorious, and even though considerably smaller than all the other roses we were grading, plants more than held their own.
